

This model complements the MultiStream range of police video interview recorders, meeting the requirement for a high quality, professional, stand-alone transcriber to facilitate verbatim transcripts of digital interviews.

Interviews may be transcribed using the high fidelity integral speaker or stereo headphones (supplied). The integrated 5" touchscreen acts as an additional aid to the transcription of video interviews. There is a video-out (VGA) connection provided on the rear panel to enable output to a large colour monitor (optional) if required.

Precise navigation through the interview is made using the touch panel or foot-switch (supplied). The MST4 is compact but highly robust with both the chassis and main cabinet being manufactured in metal. This, combined with non-slip feet, enables the unit to remain in place whilst operating the control panel and using headphones.

## Features & Specification

<b>Power input</b>	+12V DC, centre positive (AC-DC PSU included)
<b>Power consumption</b>	30W (standby 1.5W)
<b>Power button</b>	Illuminated (brief press for on/off)
<b>Fuse</b>	4 amp (Ø5 x 20mm)
